

Questionnaire to be completed by the Customer and sent to the Seller's Commercial Service for the attribution of the guarantee on the products. Only questionnaires duly completed and signed by the Customer will be accepted.

1. CUSTOMER INFORMATION

Company name:
 Activity:
 Contact information:
 Address:
 Phone:
 Fax:
 Email:
 Contact person:

2. BUILDING CHARACTERISTICS

ESTIMATED ACTIONS *(Mark with a cross)*

- Construction of a whole building.
- Extension of an existing construction.
- Extension of an existing construction initially made with materials supplied by the Seller (in this case, specify the references of the order(s) in question: date, order number, quality and quantity delivered).

DESTINATION AND USES OF THE BUILDING

- Building

- For housing use.
- Industrial.
- Agricultural.
- Others (specify any other destination).

- Activity

- Concrete nature of the activity to be carried out inside the building.
- Presence and/or use and/or storage of chemical products.
- Presence and/or use and/or storage of products in fermentation.
- Presence of animals inside the building.

- Emission of gases, vapors and fumes

- Type of heating (fuel oil, etc.):

- Means provided for the evacuation of vapors and fumes (chimney extractor, natural ventilation, forced ventilation, others):

DESTINATION OF THE PRODUCTS WHOSE REQUEST THE CUSTOMER WISHES TO MAKE

- Cover
 - Product name:
 - Thickness:
 - Coating:
 - Surface:
 - Inclination:

- Wall covering
 - Product name:
 - Thickness:
 - Coating:
 - Surface:
 - Inclination:

3. BUILDING ENVIRONMENT

GEOGRAPHICAL LOCATION OF THE BUILDING

- Implementation of the construction site
 - Name of the constructor/contractor:
 - Information
 - Geographical locationd of the project::
 - Project manager:
 - Phone:
 - Fax:
 - E-mail address:

- Building location
 - In a rural area
 - In the vicinity of buildings where animals are kept (specify implantation distance).
 - In the vicinity of storage buildings for fermentation products (specify implantation distance).
 - In the vicinity of smoke generators from fuel oil heating (specify implantation distance).
 - In the vicinity of urban centers and/or an important industrial environment or several factories that emit gases and/or fumes and/or vapors (specify implantation distance and type of gas, smoke or steam).

- In the vicinity of urban centers and/or an industrial environment with presence, in particular, of refineries, incinerators, distilleries, cement plants, paper mills, laboratories (specify distance of implementation).
- Near the edge of the sea (outside the building located less than 3 km from the coast without the possibility of direct attack by seawater).
- In the vicinity of the sea front (exterior of the building located less than 3 km from the coast with partial or momentary attack by sea water and/or direct action of the splashing of the sea on the building).
- In marine environment (exterior of the building located between 3 and 20 km from the coast).
- In mixed environment (combination of marine atmosphere and normal or severe urban and industrial atmosphere).

ALTITUDE

- More than 900 meters
- Less than 900 meters

INSOLATION

- Important
- Middle
- Low

FREQUENCY OF PLUVIAL PRECIPITATIONS

- Important
- Middle
- Low

FREQUENCY OF SNOW PRECIPITATIONS

- Important
- Middle
- Low

4. OTHER MATERIAL UTILIZED

- Cover and/or wall covering made entirely with the products
- Use of other materials such as cement, concrete bricks,...
- As cover (specify the nature of the materials and the covered surface)
- As wall covering (specify the nature of the materials and the covered surface)
